

Tackling Technology Together - A Campus Collaborative Approach (Session 099)

CREATING AN ADVISING COMMUNITY ON YOUR CAMPUS

What needs are on your campus?

What advising communities would benefit advisors on your campus?

Where is there a need for training, innovation, and exploration?

What skills and cross-training could benefit your advisors?

What do you want to share?

In what format(s) would you offer the community meetings?

How would you determine topics for community meetings?

How will you gather feedback on how the community is serving (or not serving) advisors?

What do you want to learn more about?

Do you have a forum or place to house the advising community?

Where would leadership/coordination for the advising community live on your campus?

Are there good times to host the advising community (e.g., off-weeks for meetings that are twice/month)?
